Josh Hall

Throughout my life, I have had an interest in helping others and technology. I started my career as a special education teacher. I often found myself using technology to simplify my daily tasks inside the classroom. In 2020, during the pandemic, I started to learn ReactJS. This led to me building full-stack web applications at O'Fallon Casting during the summer of 2021.

PROJECTS

API — *Express JS, NodeJS*

Developed an API to create, edit, and retrieve information from a database.

Portfolio Site — *React JS, Netlify*

Developed personal website that includes a dark mode, utilizes React Router, and utilizes component cards.

Gym Website — *Gatsby, React JS, Netlify*

Developed and designed website that includes a call to action button, is mobile friendly, and links to social media.

EXPERIENCE

O'Fallon Casting, O'Fallon, MO — *Full Stack Developer Intern*

June 2021 - PRESENT

Created frontend to take in user input (Angular JS).
Developed backend (Java) to feed form data from frontend into database.(SQL Server).

Fort Zumwalt, O'Fallon, MO — *Special Education Teacher*

January 2016 - PRESENT

Managed caseloads by setting up meetings. Automated the collection of data for individual students by using a script to send out forms at specified times. Created plans to help students be successful while in/out of school.

EDUCATION

Southeast Missouri State University– *Bachelors of Science*

MONTH 2012 - MONTH 2015

Maintained a GPA of 3.8, passed all state required certifications to teach Elementary Education (1st grade - 5th grade) and Special Education (kindergarten - 12th grade).
